

BLESSED BY BROCK

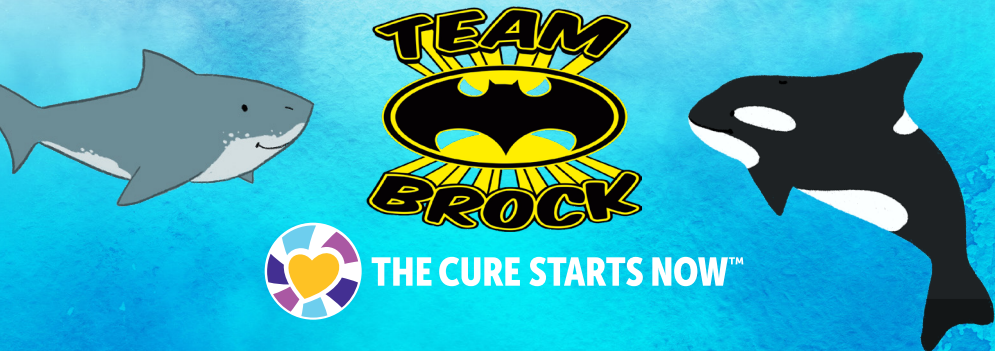

This random act of kindness was done in honor of Brock Hunter Fleming, who would have celebrated his 17th birthday on June 26th and starting his Senior year in High School. Brock died on December 10, 2016 from Diffuse Intrinsic Pontine Glioma. He loved superheroes, LEGOs, dinosaurs, killer whales, and sharks. He wanted to go to UT for college and share his dorm room with his Mom.

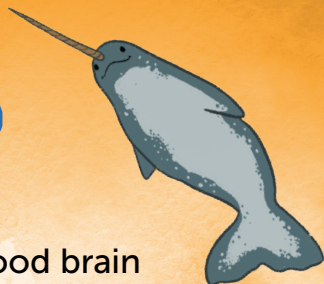

We hope that Brock has blessed you today, as he blessed so many during his life! As they spend this 10th birthday without him, it would be a great gift to Brock's family to hear how he touched your life today.

If you feel so inclined, please visit
facebook.com/teambrockfleming
and post how you were blessed by Brock
through this act of kindness.

DIPG/DMG FACTS

DIPG/DMG is a type of childhood brain cancer found in the brain stem.

2% 5-Year Survival Rate - there is currently no cure for DIPG.

Average age of diagnosis is 6-7 years old.

300 patients diagnosed with DIPG/DMG per year in the USA.*

**Cited by Dana Farber as of 2025*

Less than 6% of all federal cancer funding targets childhood brain cancer.**

***Cited by NIH as of 2025*

Help us change the prognosis for other kids and find the Homerun Cure™ for all cancers in honor of our son, Brock.
